

How often did you use your iPad during social studies and language arts this year?

Very much. We used it for our first big Wabanaki project to research, our inventions project to make a brochure and iMovie and to research. We use it to open google docs and work on them and use pages to write papers, especially thesis papers.

Describe some of the apps we have used this year and how they were helpful for you.

We use the inspiration maps app whenever we write papers. It helps us a lot to organize thoughts and write a great essay. We definitely use google docs and gmail quite frequently.

They are so useful to do work and turn it in without losing it. Especially using ebackpack to turn in work.

Did the iPad help to increase your organization? Explain how.

The iPads definitely help my organization. With ebackpack I can see what I have due and what I have turned in without having to ask my teacher. With infinite campus I can always know my grades with one touch. With pages I can write my papers and just work on it without losing it or it getting deleted.

Did the iPad help with your individual needs as a student? Explain how.

Yes, it did. I was able to keep organized which is a personal want from my school work. I am able to stay on top of all my work and know if I'm failing and what I'm missing before it's too late and it's a final grade.

Did the iPad help to engage you as a student? Explain how.

Yes. It was much more exciting in the beginning of the year to do work on the iPads because it was all new. It made me want to do my work much more. Now that I'm used to it it's not as exciting but it's still easier.
