

How often did you use your iPad during social studies and language arts this year? We have used our iPads a lot in these classes. We use them everyday or every other day, it depends on what we are doing.

Describe some of the apps we have used this year and how they were helpful for you. We have used apps like the black history app, the Maine Indian app, and also the inspiration map. The inspiration maps helped me a lot with writing the essay for *True Diary* book. The black history app did not help me much because at first they did not have my person on there, but when they did put her up, they put very little information about Lucy C. Laney.

Did the iPad help to increase your organization? Explain how. Sometimes it did and sometimes it did not. With my portfolio I was able to keep track of my assignments better and put them into files easier. Google drive I like a little bit better because it allows you to edit and put into folders. Sometimes on ebackpack you can't have actual paper documents in there so you have to take a picture of each page.

Did the iPad help with your individual needs as a student? Explain how. Yes they did, I think it helped us find ways to be more creative, but also I would of liked to have a laptop because some of the assignments would have been easier.

Did the iPad help to engage you as a student? Explain how. Yes it did help engage me but it also does distract when I know there are games I can be playing instead of doing my work, but other times It mostly does let me learn.
